

ADULT SERVICES

Care Management

Care Management services are designed to develop and coordinate supports for persons living and recovering from chronic illness. We strive to accomplish this by providing our services with respect and professionalism.

CARE MANAGEMENT

The primary function of Care Management is to link clients to services and agencies that can improve their quality of life. A Care Manager assists clients with establishing goals and coordinating services. Each client is helped individually in accordance to their recovery goals and within their changing needs and circumstances.

Our Care Managers work closely with agencies involved with the client's recovery. We assist clients in developing relationships with people who may be a support to them in the future. Our staff members work every day to provide persons recovering from mental illness the assistance they need to live independently in the community.

MHADC's Care Management Program annually serves over 3,000 people over the age of 18 who have a chronic illness. As Care Managers, our primary goal is to decrease, if not help, avoid hospitalizations and to help individuals attain their personal goals, and to assure that the client keeps a focus on the necessary medical prevention measures that we all should align with. We do this by working with our clients in a true partnership. We assist in obtaining necessary medical treatment, vocational training or careers, residential opportunities, educational services and any other services needed for their recovery and self management.

As part of MHADC's Adult Mental Health Care Management or Health Home programs, we assist clients in maintaining their independence and self-sufficiency so they can live successfully in the community. We take a proactive and client-centered approach by treating each person on an individual basis.

MHADC has a supported housing program for not only adults but also young adults. We work with our clients and their landlords to ensure positive outcomes. To provide ongoing support, a one-hour visit is made to the client's home each month.
